

PRESS RELEASE

VSX ANNOUNCES MATTHIAS SIEGEL AS NEW MANAGING DIRECTOR

Dresden, Germany, 27 March 2024. After more than 30 years, Hanns-Henrik Vogel and Jens-Uwe Vogel, founders of the software company VSX - VOGEL SOFTWARE GmbH, hand over the management of the company to Matthias Siegel, who will take over as Managing Director on April 1, 2024. The new owner Everfield also welcomes this decision and is actively involved in supporting Matthias with the resources and guidance to ensure a good and successful start.

In his previous role as project manager, Matthias Siegel supported major customers with the implementation of Spaix pump selection software and its integration. After successfully completing his studies at TU Dresden, he joined VSX in 2007. Thanks to his many years of professional experience, he is not only very familiar with the company's workflows and business processes, but also has detailed knowledge of customer requirements and expectations.

In addition, Jens-Uwe Vogel has been mentoring him over the past months to ensure a seamless transition. "Matthias brings a wealth of experience to his new position as Managing Director and has proven in recent months that he is up for the challenge," says Jens-Uwe Vogel. "Not least because of his strong commitment to the future of the company, I have every confidence in him as CEO. He leads a team of highly qualified specialists at VSX who have been involved in the development of sizing and CPQ software for the pump industry for many years".

Matthias Siegel comments: "I am very pleased with the trust placed in me and highly motivated to continue to drive the company's development as Managing Director. On behalf of the entire team, I would like to thank Hanns-Henrik and Jens-Uwe Vogel for their work. VSX would not be where it is today without the vision and constant commitment of the two brothers, and their trust in the entire team. We wish them all the best for the future."

Hanns-Henrik Vogel enters into well-deserved retirement upon completion of the transition. Jens-Uwe Vogel will continue to support the company as a consultant, ensuring a smooth management transition for the benefit of VSX's customers. He will also continue to support the company with his wealth of experience in pump technology in the various areas of sales, product development, and customer support.

The management change will not affect customers. VSX is and will remain a reliable partner in all areas. The changes implemented ensure long-term stability and security for VSX customers.

VSX - VOGEL SOFTWARE develops applications for the selection and configuration of fluidic components and systems, such as pumps, fittings and piping. The software solutions replace conventional product catalogs and simplify the sales processes of both manufacturers and users. Moreover, the software users benefit from additional applications such as technical calculation, support for complex product configurations, as well as quotes and technical documents created directly in the system with a mouse click.

VSX - VOGEL SOFTWARE was founded by brothers Hanns-Henrik and Jens-Uwe Vogel in Dresden in 1993, and has been growing continuously ever since. Due to its intensive international orientation, the company generates about 65% of its turnover outside the domestic German market. In 2023, the company was acquired by Everfield.
